

COMPLETE IT START-UP SERVICES

One Partner Handling All Your IT Needs, So You Can Focus on Building Your Business

A new business needs a completely new IT infrastructure—network, servers, email, telecom, document management, desktops/laptops, printers/copiers, brand identity, website, web marketing, web hosting—it's a lot of work to manage and outsource.

Save the effort and use PlanetMagpie's Complete IT Start-Up Services. Our Microsoft-certified team of engineers, developers and designers bring you the expertise required to architect and deploy the new systems you'll need. And the business-grade IT and web solutions that we trust. Microsoft, IBM, Cisco, Juniper, and Dialogic.

FEATURES

With our Complete IT Start-Up Services, each of our three divisions handles different parts of your IT infrastructure. Implement any or all.

IT Consulting Division

Server Setup
Exchange-based Email
VoIP Telephone System
Unified Communications
Document Management

Network Support Division

Network Setup
Desktop and Laptop Installation
Printers, Copiers, Scanners, Fax
Graphics and Video Equipment
On-Site / Remote Network Support

W3 Services Division

Identity Creation and Branding
Website Design / Development, with CMS Option
Web Marketing (SEO, Email Marketing, Copywriting)
Web Hosting
Web Maintenance (post launch)

And we've even taken it one step further. For companies that want to reduce their hardware, power, and on-site support costs, we offer Virtual Office Hosting in our Silicon Valley datacenter.

HOSTED OPTIONS

- Hosted Small Business Server 2008: the power of a big business in a small box
- Hosted Office Communications Server 2007 VoIP System: run your phone system through our datacenter
- Hosted Exchange Server 2010: all the benefits of Exchange 2007, plus email archival and discovery
- Hosted SharePoint 2007: accessibility and security for your document storage
- Hosted ERP: your company's financial data, backed up nightly in our datacenter

Your entire IT infrastructure—networked, online and ready for work. Main server capacity, desktops/laptops set up, email, and a new phone system. Plus, a new brand identity and website, ready to launch.

BENEFITS

- » One company to interface with—from architecture to installation to billings
- » Package Pricing from our manufacturer partners—leverage your purchasing power
- » "Green" power savings—our hosted options save on power and hardware
- » Award-winning web design team to give your company a successful look and feel from the start
- » Website content management system to give you immediate control of your website
- » Network Support and Web Maintenance SLAs to give you ongoing support of your new systems

Thanks to PlanetMagpie's dogged ingenuity, complete IT setups like this can be done by one company, and unified by a single line of software technology. Contact PlanetMagpie today to schedule a demonstration of our Complete IT Start-Up Services.
